

```
const express = require('express');
const app = express();

app.use(express.json());

const foodItems = [
  { id: 1, name: "Pizza", price: 100 },
  { id: 2, name: "Burger", price: 50 },
  { id: 3, name: "Pasta", price: 75 }
];

// TODO: Implement an API route to return food items
app.get('/api/food', (req, res) => {
  // Implement this function
});

const PORT = 5000;
app.listen(PORT, () => console.log(`Server running on port ${PORT}`));
```
